X-SIGHTING

OHS EYE PROTECTOR

THE X-SIGHTING CONCEPT: Where Safety Meets Fashion

The EYRES X-SIGHTING RANGE has been created to offer superior protection for your eyes that doesn't sacrifice safety or style.

Through the use of the latest technology, we have combined all of the key design features in safety, sport, fashion and ballistic sunglasses into an exclusive X-SIGHTING RANGE of protective eyewear.

Optimum vision, ultimate protection along with comfort and fit are the key characteristics of a quality safety frame. EYRES Optics X-SIGHTING RANGE has evolved to merge all these features and fine tuned them by taking into consideration the needs of the individual wearer.

For those outdoors in a harsh environment, the only thing that counts is getting the job done in a safe efficient manner. Precision is everything whilst being able to focus on each task.

Just as specialised tools are tuned to the job's specific task, the eyewear also needs to be customised to allow for maximum positive results and achievement.

Look great and protect your eyes with EYRES Optics X-SIGHTING Low Impact and Medium Impact ranges.

EYRES X-SIGHTING LOW IMPACT

These versatile designs have been impact tested to protect you from flying fragments travelling at a speed of at least 12 metres per second (45km/h). For the fashion-conscious wearer in light industrial environments, EYRES X-Sighting eye protectors blocks out 99.9% of UV and glare.

CAUTION: Any alteration to this eyewear, including the use of heating apparatus to insert a lens invalidates any guarantee of the eye protector.

NEW AUSTRALIAN STANDARDS MAKING OUR PRODUCTS INTERNATIONALLY COMPETITIVE

The compliance of AS1337.1 that was published in 2010 is being phased in during 2012. The changes and interrelationships of standards relevant to supply prescription eye protectors is summarised below:

AS1337.1:2010 Plano Eye Protectors Low, Medium and High Impact, Supersedes AS1337:1992.

AS1337.6:2007 Prescription Eye Protectors Low and Medium Impact Only.

X-Safe Medium Impact safety glasses and goggles offers a unique combination of superior strength and flexibility. The technology that support our cutting edge stylish designs allows us to provide an advance range of eye protection which assures optical integrity without compromising peripheral performance.

D'ARASSUS QUALITY MANAGEMENT SYSTEM

Every compliance test generates an amount of formula calculations

OPTICAL POWERS OF LENSES - 14 RESULTS

TRANSMITTANCE REQUIREMENTS - 29 RESULTS

IMPACT RESISTANCE - 105 RESULTS

The following calculations are required to complete testing:

OPTICAL POWER OF LENSES - 22 FORMULA

TRANSMITTANCE REQUIREMENTS - 60 FORMULA

IMPACT RESISTANCE - 45 FORMULA

The calculation of the compliance contains a further 299 formulas that are calculated and tested. In total 426 calculations are completed and tested using 146 individual pieces of raw data, for a pass or fail according to the Australia Standards.
